

Industrial Check Counting Weighing Scales

*“Powerful choice for reliability
in industrial weighing & counting”*

Description

We are instrumental in providing our clients a broad range of **DIGITAL CHECK WEIGHING & COUNTING SCALE** that is manufactured using supreme class raw materials as per the set industry norms. To ensure eminence and flawlessness, this is rigorously tested by our quality controllers on various parameters. This is broadly known for its high performance, corrosive resistant nature, accurate reading, perfect finish, compact design and durability. This electronic counting and weighing Scale are available in various models and capacities to fulfill the wide needs of the clients.

Key features: -

- Bright 16mm LCD display with LED backlight for easy viewing in most environments
- Colour-coded keys facilitate quick recognition of the most frequently used buttons
- Parts counting with freely selectable sample sizes
- Level indicator and adjustable feet ensure proper balance setup for optimum weighing results
- Large, grade stainless steel pan allows easy cleaning
- Rechargeable battery 6V/4ah for 80 hours continuous use
- Low Battery Indicator and Charging Status Indicator
- Zero-tracking feature ensures display returns to zero reading
- Internal counting resolution 1:600,000 for precise results
- Auto power-off to save energy
- Overload protection helps prevent damage to internal components
- Digital filtering helps minimise effects of vibration and disturbances
- External calibration allows for verification and adjustment with weights
- Memory accumulation totals results
- Solid ABS housing is durable for industrial use
- Total Count, 10 x One-touch Piece Weight Memory keys (Total 20 Piece Weight Memory).

Power Source :-

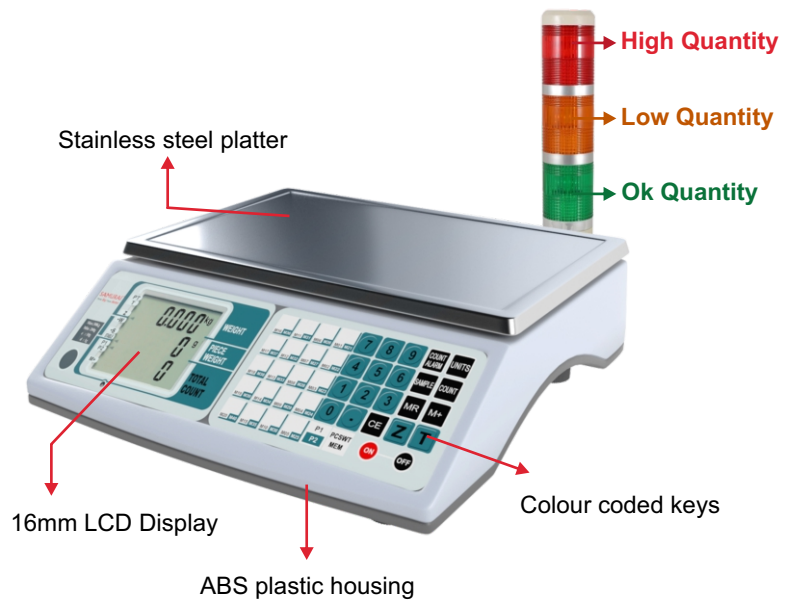

Input AC 100V-240V output 12V-1Amp

Three Colour Tower Lamps :-

Red Light :- If the number of parts being checked falls behind the limit fixed prior hand then the red signal flashes as an indication of high quantity.

Green Light :- The green light is an indication of the accuracy. If the parts being counted are absolutely equal to the limit fixed then it flashes as an indication of correctness. If the number of parts being checked

Yellow Light :- If the minimum range is fixed part number wise and if the particular part number exceeds the limit then the power light automatically gives the Yellow signal & 24W warning signal.

Specification :-

Capacity(kg)	Accuracy (g)	Platter material
1.5kg 3kg 6kg 15kg 30kg	0.05g 0.1g 0.2g 0.5g 1g	Stainless Steel 310 x 220mm
